Mehmetcan Şahin

Software Engineer

WORK EXPERIENCE

Ondokuzon, Ankara, Lead Software Engineer (2017 - Present)

I work in fullstack software development, technical leadership, and team management. I am responsible not only for software development but also for creating, deploying, and managing the infrastructure of these applications.

I also work on devops topics, such as writing automated tests for applications, creating CI/CD processes, and improving application performance.

- Contenting: An intelligent content platform that suggests suitable content by crawling websites using machine learning. (Rust, Python, Laravel, Remix)
- Developed the web application for the TV+ digital platform. (Laravel)
